Experience

Machine Learning Engineer Sept 2020 - Present

DispatchHealth | Denver, CO

- Developed a new regression model with XGBoost to predict how long a provider will be on-scene, reduced the RMSE by 20% and created a more robust API with Kibana for monitoring
- Built 10+ ELT data pipelines using Apache Airflow, dbt and Prefect leveraging AWS Fargate containers, AWS Glue, AWS Athena and Redshift
- Used ElasticSearch and Kibana to analyze logging data and Looker to communicate model performance

Associate Data Science Instructor & Data Science Resident March 2020 - Sept 2020

Galvanize Inc. | Denver, CO

- Performed lectures and helped students in the Data Science Immersive (DSI) and with Python

Data Scientist November 2019 - March 2020

El Cap | Denver, CO

- Performed a customer segmentation analysis for climbing gym customers in the Denver area
- Developed a cannibalization model in order to predict the effects of opening new gym locations
- Model predicted member cannibalization with 75% accuracy
- Used geospatial analysis to featurize customer behavior

Skills

Programming:

Python, SQL, Bash, VCS (git), Pandas, Numpy, Jupyter Notebooks, Python packaging, Vim

Data Science:

Matplotlib, Scikit-learn, XGBoost, Data Wrangling, Statistical Modeling, Ensemble Models, Clustering Methods, Looker

Data Engineering:

Apache Airflow, Prefect, dbt, AWS, GCP, Linux, Docker, PostgreSQL, MongoDB, Terraform, Spark, FastAPI, Flask, Kibana, ElasticSearch, Web Scraping

Education

Data Science Immersive (Bootcamp) 2019 - 2020

Galvanize Inc. | Denver, CO

- 13-week immersive with 700+ hours of coding, weekly Case Studies, and 3 capstone projects. Python-based curriculum focused on machine learning and best practices in statistical analysis.

B.S. Mechanical Engineering 2011 - 2015

Lafayette College | Easton, PA

- NCAA Division 1 Football Player
